

Reports

Reports were created to provide insights into key operational metrics.

- **Daily Bookings:**
 - **Report Type:** Bookings
 - **Configuration:** Grouped by Created Date (grouped by Calendar Day). Shows columns like Booking Number, Station, Slot, Status, Total Price. Filtered by date as needed.
 - **Purpose:** To track the volume of bookings created each day.
- **Revenue by Station:**
 - **Report Type:** Bookings
 - **Configuration:** Grouped by Station. Summarizes the Total Price field (Sum). Filtered to include only Completed Bookings.
 - **Purpose:** To analyze revenue generation per charging station.
- **Slot Utilization:**
 - **Report Type:** Slots
 - **Configuration:** Grouped first by Station, then by Availability. Shows Slot Name. Optionally includes a stacked bar chart (X-Axis: Station, Y-Axis: Record Count, Stack By: Availability).
 - **Purpose:** To visualize the current status (Available, Unavailable, etc.) of slots across different stations.

Dashboard

A central dashboard was created to provide a high-level overview of key performance indicators (KPIs).

- **Dashboard Name:** EV Charging Overview
- **Components Added:**
 1. **Total Bookings Today:** Uses the Daily Bookings report (filtered for Today), displayed as a **Metric** component showing the Record Count.
 2. **Revenue by Station:** Uses the Revenue by Station report, displayed as a **Bar Chart** showing the Sum of Total Price per Station.
 3. **Overall Slot Utilization:** Uses the Slot Utilization by Station report, displayed as a **Gauge** component showing Record Count against defined thresholds, or using the report's built-in chart.

Security Review

The security model was configured using a layered approach to ensure users have appropriate access.

- **Organization-Wide Defaults (OWD):**
 - Set the baseline access for objects.
 - Booking: Private
 - Payment: Private
 - Station: Public Read Only
 - Slot: Controlled by Parent (inherits from Station due to Master-Detail relationship)
 - Account/Contact: Private (or as per organizational requirements)
- **Role Hierarchy:**
 - Established a vertical structure (e.g., CEO → Operations Manager → Station Manager → Station Staff).
 - Enables managers to view records owned by subordinates when OWD is Private.
- **Profiles:**
 - Define object permissions (Create, Read, Edit, Delete), field permissions, app access, etc.
 - A custom profile Station Staff was cloned from Standard User and configured with specific permissions needed for the role (e.g., Read/Create/Edit on Bookings, Read-Only on Stations).
- **Sharing Rules:**
 - Used to grant additional record access laterally or based on criteria when OWD is restrictive.

- Example: A criteria-based rule (Share Bookings within Station) shares Booking records with users in the same Station Staff role or group based on the Station associated with the Booking, granting Read access.
- **Permission Sets:**
 - Used to grant *additional* permissions to specific users without changing their profile.
 - Example: A Manage Payments permission set grants Edit/Delete access on the Payment__c object and is assigned only to users in the finance team.
- **Field-Level Security (FLS):**
 - Controls visibility and editability of specific fields for different profiles.
 - Example: The Hourly_Rate__c field on the Slot__c object was made Read-Only or Hidden for the Station Staff profile via Field-Level Security settings on the field itself.

The screenshot shows the Salesforce Setup interface for Sharing Settings. The left sidebar contains navigation links for Setup, Home, and Object Manager. The main content area is titled 'Sharing Settings' and lists various sharing rules for different objects. The 'Charging Slot Sharing Rules' section is expanded, showing a table with columns for Action, Criteria, Shared With, and Access Level. The table contains one rule for the 'Station Staff' role with 'Read Only' access. Other sections like 'Booking Sharing Rules', 'Case Sharing Rules', 'Charging Station Sharing Rules', 'Payment Sharing Rules', and 'Vehicle Sharing Rules' are also visible, each with a 'No sharing rules specified' message.

Action	Criteria	Shared With	Access Level
Edit Del	(Charging Slot: Total Slots EQUALS 100) AND (Charging Slot: Slot Number CONTAINS pending)	Role: Station Staff	Read Only
